COMPANY PROFILE

Where Innovation Meets Engineering

COMPANY OVERVIEW

Reagile Engineering Services (Pty) Ltd, founded in 2015, is a versatile company specializing in civil, mechanical, and electrical engineering.

We provide a range of services, including the refurbishment of mechanical components, conveyor belt and hydraulic cylinder maintenance, high-pressure cleaning, and civil engineering projects. Our expertise extends to electrical maintenance, general building upkeep, and transportation services, with a focus on mechanical and instrumentation engineering.

We are committed to excellence and innovation, aiming to be a national leader in our field. Our goal is to add value through exceptional service, strategic partnerships, and a commitment to inclusivity and community development.

We target key industries such as manufacturing, construction, and public works, striving to contribute meaningfully to economic growth.

VISION & MISSION

Vision

To be a nationally recognized leader in civil, mechanical, and electrical engineering, renowned for our commitment to innovation, excellence, and community development. We aim to set the standard for industry practices while driving economic growth and fostering inclusivity.

Mission

Our mission is to deliver high-quality engineering solutions that exceed client expectations and add value through exceptional service and strategic partnerships. We are dedicated to maintaining the highest standards of safety, integrity, and collaboration, while supporting job creation and community development, with a special focus on women, disabled youth, and historically disadvantaged individuals.

Values

Safety: Prioritize safety and adhere to high standards.

Collaboration: Foster teamwork and leverage diverse skills.

Success: Commit to excellence and continuous improvement.

Respect: Value diversity and treat everyone with dignity.

Integrity: Uphold ethical standards and ensure transparency.

Innovation: Embrace change and encourage creative solutions.

Community: Support job creation and community development, especially for women, disabled youth, and historically disadvantaged individuals.

OUR SERVICES

Civil Engineering

Providing comprehensive civil engineering solutions, including paving, palisade construction, road repairs, chrome cast plaster, and bricklaying services.

Mechanical Engineering

Specializing in the refurbishment and maintenance of:

- Mechanical Pumps
- Gearboxes
- Hydraulic Cylinders
- PF Burners
- Valves
- Tube Bending (Hot and Cold)
- Soot Blowers
- Oil Burners
- Conveyor Belts
- Pulleys and Gears

Electrical Engineering

Offering expert electrical maintenance, general building wiring, CoC certification, DC and AC motor installation, cable installation, and solar PV panel and inverter setup.

Instrumentation Engineering

Expertise in mechanical and instrumentation engineering, with a focus on precision and reliability.

Industrial Supply

We supply:

- Office Supplies
- PVC and Steel Pipes
- Lubricants
- Boiler Tubes & Shields
- Mechanical and Electrical Equipment
- Welding Equipment
- Gas Cylinders

Surface Preparation

Offering sandblasting and polishing services.

Transportation, Accommodation, and Food & Beverage

We offer efficient transport for materials, comfortable accommodation for teams, and catering services.

Industrial Cleaning Services

Specializing in vacuuming, high-pressure cleaning (HP cleaning), and boiler washing. Our services are crafted to provide comprehensive solutions across industries, ensuring top-tier quality and reliability in every project.
